

Technical Support Bulletin: Extending an Arc to Intersect With Wall

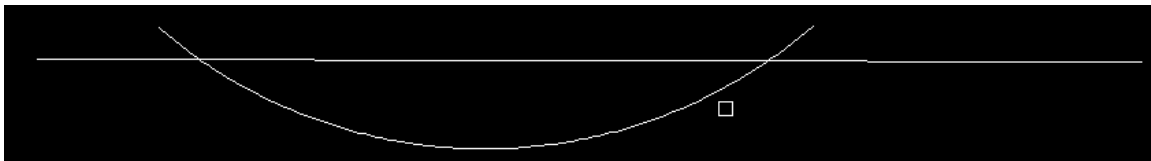

Abstract: If you want to extend an arc to intersection with wall you can use these AllenCAD command. Last Update 9-15-14

Assume you start with:

Use Edit length tool  on modify toolbar

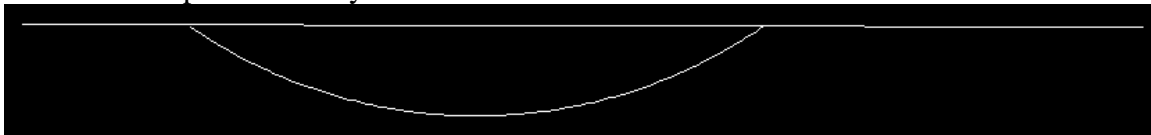

Select end of arc and move mouse to extend arc beyond end of line. Repeat for other end of arc

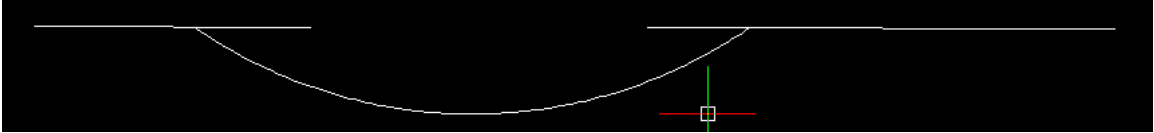

Use trim tool  on modify toolbar

Select wall as trimming edge

Select arc endpoint as entity to trim

select modify -> Split
click on line two places between arc

use trim again

select arc as cutting edge and end points of broken segment as entity to trim
